JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject Index of Volume 463

Adsorbed cyanide
Potential modulated reflectance spectroscopy of Pt(111) in acidic and alkaline media: cyanide adsorption, 109
Adsorbed halides
'In-situ' observation of halide ion adsorption on a gold electrode using synchrotron far infrared spectroscopy, 258
Adsorption
Adsorption of sulfate ions on monocrystalline copper electrodes: the structural effects, 1
Phospholipid monolayers studied by a combination of cyclic voltammetry and Langmuir techniques at the water | 1,2-dichloroethane interface, 242
Alcohol electroxidation
Electrocatalytic properties of nickel(II) hydrotalcite-type anionic clay: application to methanol and ethanol oxidation, 123
Analysis of the iodide ion
Voltammetric determination of the iodide ion with a quinine copper(II) complex modified carbon paste electrode, 16
Anion adsorption
'In-situ' observation of halide ion adsorption on a gold electrode using synchrotron far infrared spectroscopy, 258
Anion receptors
Silicon-based ferrocenyl dendrimers as anion receptors in solution and immobilized onto electrode surfaces, 87
Anodic oxide films
Impedance of ruthenium electrodes in sulphuric acid solution, 29
Ascorbic acid
Detection of dopamine in the presence of a large excess of ascorbic acid by using the powder microelectrode technique, 93

Battery
A poly(vinylidene fluoride)-based gel electrolyte membrane for lithium batteries, 248

Carbon paste electrode
Use of a zeolite-modified electrode for the study of the methylviologen–sodium ion-exchange in zeolite Y, 100
Voltammetric determination of the iodide ion with a quinine copper(II) complex modified carbon paste electrode, 16
Cation-deficient spinel
Characterization of a new spinel Li–Cr–Mn–O for secondary lithium batteries, 24
Cell resistance
Steady state voltammetry at low electrolyte/reactant concentration ratios: what it means and what it does not mean, 45
Chemically modified electrode
Electrocatalytic reduction of molecular oxygen on a sodium montmorillonite-methyl viologen carbon paste chemically modified electrode, 253
Chemically modified electrodes
Electrocatalytic properties of nickel(II) hydrotalcite-type anionic clay: application to methanol and ethanol oxidation, 123
Conducting polymer
Coupled electron and proton transfers: compared behaviour of oxometalates in aqueous solution or after entrapment in polymer matrices, 129
Confocal microscopy
Coupled electron and proton transfers: compared behaviour of oxometalates in aqueous solution or after entrapment in polymer matrices, 129
Convolution voltammetry
Kinetics of sulfide ion adsorption at copper amalgam electrode, 200
Copper
Adsorption of sulfate ions on monocrystalline copper electrodes: the structural effects, 1
Copper amalgam electrode
Kinetics of sulfide ion adsorption at copper amalgam electrode, 200
Cyclic voltammetry
Enhanced electron transfer for hemoglobin in poly (ester sulfonic acid) films on pyrolytic graphite electrodes, 53
Cyclodextrin
Electrochemical study of methylalkylviologens using an electrochemical quartz crystal microbalance, 224

Dehydrogenation system
Construction of a new dehydrogenation system using a two-compartment cell separated by a palladized Pd sheet electrode, 116
Dendrimers
Silicon-based ferrocenyl dendrimers as anion receptors in solution and immobilized onto electrode surfaces, 87
Donnan effects
Coupled electron and proton transfers: compared behaviour of oxometalates in aqueous solution or after entrapment in polymer matrices, 129
Dopamine
Detection of dopamine in the presence of a large excess of ascorbic acid by using the powder microelectrode technique, 93

Eastman AQ
Enhanced electron transfer for hemoglobin in poly (ester sulfonic acid) films on pyrolytic graphite electrodes, 53
Electrocatalysis
Electrocatalytic properties of nickel(II) hydrotalcite-type anionic clay: application to methanol and ethanol oxidation, 123
Enhanced electron transfer for hemoglobin in poly (ester sulfonic acid) films on pyrolytic graphite electrodes, 53
Electrocatalytic reduction
Electrocatalytic reduction of molecular oxygen on a sodium montmorillonite-methyl viologen carbon paste chemically modified electrode, 253
Electrochemical impedance
Impedance of ruthenium electrodes in sulphuric acid solution, 29
Electrochemical impedance spectroscopy
Electrochemical and photoelectrochemical behaviour of poly-3-methylthiophene and polybithiophene in non-aqueous solutions: 1. Dark and light processes in systems with and without cathodic doping, 190

PII: S0022-0728(99)00045-5

Electrochemical oxidation
In-situ infrared reflectance spectroscopic study of propanediol electrooxidation at platinum and gold: Part 1. 1,3-Propanediol, 63
Electrochemical quartz microbalance
Electrochemical study of methylalkylviologens using an electrochemical quartz crystal microbalance, 224
Electrochemical transformation
Electrochemical behaviour of $[Mn_2^{III,IV}O_2(phen)_4]^{3+}$ complex in aqueous phen + phenH$^+$ buffer; phen = 1,10-phenanthroline, 119
Electrolysis: IR reflectance spectroscopy
In-situ infrared reflectance spectroscopic study of propanediol electrooxidation at platinum and gold: Part 1. 1,3-Propanediol, 63
Electrolyte
Thermodynamics for the situation where there is a discontinuous change of the electrode condition with potential due to the formation of a two dimensional condensed phase—diffuse layer effects, 9
Electron-conducting polymers
Electrochemical and photoelectrochemical behaviour of poly-3-methylthiophene and polybithiophene in non-aqueous solutions: 1. Dark and light processes in systems with and without cathodic doping, 190
Electron transfer
Investigating the reduction characteristics of transient free radicals by laser-pulse electron photo-injection—mechanism diagnostic criteria and determination of reactivity parameters from time-resolved experiments, 157
Electrosorption
Kinetics of sulfide ion adsorption at copper amalgam electrode, 200

Far infrared spectroscopy
'In-situ' observation of halide ion adsorption on a gold electrode using synchrotron far infrared spectroscopy, 258
Ferrocene
Silicon-based ferrocenyl dendrimers as anion receptors in solution and immobilized onto electrode surfaces, 87
Flow-through electrochemical cell
Flow-through electrochemical cell for accurate pH measurements at temperatures up to 400°C, 146
Formic acid
Construction of a new dehydrogenation system using a two-compartment cell separated by a palladized Pd sheet electrode, 116
FTIR spectroscopy
In-situ FTIR studies on the electrochemical oxidation of histidine and tyrosine, 218

Gold electrode
'In-situ' observation of halide ion adsorption on a gold electrode using synchrotron far infrared spectroscopy, 258

Hemoglobin
Enhanced electron transfer for hemoglobin in poly (ester sulfonic acid) films on pyrolytic graphite electrodes, 53
Heteropolyanion
Coupled electron and proton transfers: compared behaviour of oxometalates in aqueous solution or after entrapment in polymer matrices, 129
High temperature subcritical and supercritical aqueous solutions
Flow-through electrochemical cell for accurate pH measurements at temperatures up to 400°C, 146
Histidine
In-situ FTIR studies on the electrochemical oxidation of histidine and tyrosine, 218
Hydrated ruthenium oxyhydroxide
Impedance of ruthenium electrodes in sulphuric acid solution, 29
Hydrogen bond
Hydrogen bond complexation of dimethyl-[1-butyl-2,4-dioxo (1H,3H)pyrimido]tetrathiafulvalene with aminopyridine derivatives probed by cyclic voltammetry, 212

Impedance analysis
Steady state voltammetry at low electrolyte/reactant concentration ratios: what it means and what it does not mean, 45
Ion-exchange
Use of a zeolite-modified electrode for the study of the methylviologen–sodium ion-exchange in zeolite Y, 100
Ion transfer
Polarization phenomena at the water | *o*-nitrophenyl octyl ether interface: Part III. Kinetics of tetraethylammonium ion transfer across the polymer supported interfaces, 232
Isotherm
Use of a zeolite-modified electrode for the study of the methylviologen–sodium ion-exchange in zeolite Y, 100
Isotherms
Adsorption of sulfate ions on monocrystalline copper electrodes: the structural effects, 1
ITIES
Phospholipid monolayers studied by a combination of cyclic voltammetry and Langmuir techniques at the water | 1,2-dichloroethane interface, 242

Kinetics
Kinetics of sulfide ion adsorption at copper amalgam electrode, 200
Polarization phenomena at the water | *o*-nitrophenyl octyl ether interface: Part III. Kinetics of tetraethylammonium ion transfer across the polymer supported interfaces, 232

Langmuir trough
Phospholipid monolayers studied by a combination of cyclic voltammetry and Langmuir techniques at the water | 1,2-dichloroethane interface, 242
Lipid
Phospholipid monolayers studied by a combination of cyclic voltammetry and Langmuir techniques at the water | 1,2-dichloroethane interface, 242
Lithium
A poly(vinylidene fluoride)-based gel electrolyte membrane for lithium batteries, 248
Lithium cell
Characterization of a new spinel Li–Cr–Mn–O for secondary lithium batteries, 24
Lithium incorporation and extraction, Molten carbonate fuel cell
Electrochemical behaviour of $Li_xNi_{1-x}O$ in molten $Li_2CO_3 + Na_2CO_3$ eutectic, 78
Low electrolyte/reactant ratio
Steady state voltammetry at low electrolyte/reactant concentration ratios: what it means and what it does not mean, 45
Low index single crystal surfaces
Potential modulated reflectance spectroscopy of Pt(111) in acidic and alkaline media: cyanide adsorption, 109

Manganese complexes
Electrochemical behaviour of $[Mn_2^{III,IV}O_2(phen)_4]^{3+}$ complex in aqueous phen + phenH$^+$ buffer; phen = 1,10-phenanthroline, 119
Mechano–electric oscillations
Polarization phenomena at the water | *o*-nitrophenyl octyl ether interface: Part III. Kinetics of tetraethylammonium ion transfer across the polymer supported interfaces, 232
Membrane
A poly(vinylidene fluoride)-based gel electrolyte membrane for lithium batteries, 248

Methylalkylviologens
Electrochemical study of methylalkylviologens using an electrochemical quartz crystal microbalance, 224
Methyl viologen
Electrocatalytic reduction of molecular oxygen on a sodium montmorillonite-methyl viologen carbon paste chemically modified electrode, 253
Methylviologen
Use of a zeolite-modified electrode for the study of the methylviologen–sodium ion-exchange in zeolite Y, 100
Migration
Steady state voltammetry at low electrolyte/reactant concentration ratios: what it means and what it does not mean, 45
Modified electrodes
Silicon-based ferrocenyl dendrimers as anion receptors in solution and immobilized onto electrode surfaces, 87
Molecular recognition
Hydrogen bond complexation of dimethyl-[1-butyl-2,4-dioxo(1H,3H)pyrimido]tetrathiafulvalene with aminopyridine derivatives probed by cyclic voltammetry, 212
Silicon-based ferrocenyl dendrimers as anion receptors in solution and immobilized onto electrode surfaces, 87
Molten carbonate fuel cell
Electrochemistry of Ni oxidation in molten $Li_2CO_3 + Na_2CO_3$ eutectic, 72
Molten carbonates
Electrochemical behaviour of $Li_xNi_{1-x}O$ in molten $Li_2CO_3 + Na_2CO_3$ eutectic, 78
Electrochemistry of Ni oxidation in molten $Li_2CO_3 + Na_2CO_3$ eutectic, 72
Monocrystalline electrodes
Adsorption of sulfate ions on monocrystalline copper electrodes: the structural effects, 1

Nickel oxidation
Electrochemistry of Ni oxidation in molten $Li_2CO_3 + Na_2CO_3$ eutectic, 72
Ni(II) hydrotalcites
Electrocatalytic properties of nickel(II) hydrotalcite-type anionic clay: application to methanol and ethanol oxidation, 123

Ohmic drop
Steady state voltammetry at low electrolyte/reactant concentration ratios: what it means and what it does not mean, 45
Oxidation
In-situ FTIR studies on the electrochemical oxidation of histidine and tyrosine, 218
Oxo complexes
Electrochemical behaviour of $[Mn_2^{III,IV}O_2(phen)_4]^{3+}$ complex in aqueous phen + phenH$^+$ buffer; phen = 1,10-phenanthroline, 119
Oxygen
Electrocatalytic reduction of molecular oxygen on a sodium montmorillonite-methyl viologen carbon paste chemically modified electrode, 253

Palladium electrode
Construction of a new dehydrogenation system using a two-compartment cell separated by a palladized Pd sheet electrode, 116
pH Measurements
Flow-through electrochemical cell for accurate pH measurements at temperatures up to 400°C, 146
Photo-current
Investigating the reduction characteristics of transient free radicals by laser-pulse electron photo-injection—mechanism diagnostic criteria and determination of reactivity parameters from time-resolved experiments, 157
Photocurrent
Electrochemical and photoelectrochemical behaviour of poly-3-methylthiophene and polybithiophene in non-aqueous solutions: 1. Dark and light processes in systems with and without cathodic doping, 190
Photoelectrochemistry
Electrochemical and photoelectrochemical behaviour of poly-3-methylthiophene and polybithiophene in non-aqueous solutions: 1. Dark and light processes in systems with and without cathodic doping, 190
Photo-injected charge
Investigating the reduction characteristics of transient free radicals by laser-pulse electron photo-injection—mechanism diagnostic criteria and determination of reactivity parameters from time-resolved experiments, 157
Platinum
Potential modulated reflectance spectroscopy of Pt(111) in acidic and alkaline media: cyanide adsorption, 109
Polybithiophene
Electrochemical and photoelectrochemical behaviour of poly-3-methylthiophene and polybithiophene in non-aqueous solutions: 1. Dark and light processes in systems with and without cathodic doping, 190
Polymer supported membrane
Polarization phenomena at the water | *o*-nitrophenyl octyl ether interface: Part III. Kinetics of tetraethylammonium ion transfer across the polymer supported interfaces, 232
Poly-3-methylthiophene
Electrochemical and photoelectrochemical behaviour of poly-3-methylthiophene and polybithiophene in non-aqueous solutions: 1. Dark and light processes in systems with and without cathodic doping, 190
Potential
Thermodynamics for the situation where there is a discontinuous change of the electrode condition with potential due to the formation of a two dimensional condensed phase—diffuse layer effects, 9
Powder microelectrode technique
Detection of dopamine in the presence of a large excess of ascorbic acid by using the powder microelectrode technique, 93
Preconcentration
Use of a zeolite-modified electrode for the study of the methylviologen–sodium ion-exchange in zeolite Y, 100
Propanediol
In-situ infrared reflectance spectroscopic study of propanediol electrooxidation at platinum and gold: Part 1. 1,3-Propanediol, 63

Quartz crystal microbalance
Coupled electron and proton transfers: compared behaviour of oxometalates in aqueous solution or after entrapment in polymer matrices, 129
Quinine copper complex
Voltammetric determination of the iodide ion with a quinine copper(II) complex modified carbon paste electrode, 16

Radical polarogram
Investigating the reduction characteristics of transient free radicals by laser-pulse electron photo-injection—mechanism diagnostic criteria and determination of reactivity parameters from time-resolved experiments, 157
Radiometry
Adsorption of sulfate ions on monocrystalline copper electrodes: the structural effects, 1

Redox polymer
Coupled electron and proton transfers: compared behaviour of oxometalates in aqueous solution or after entrapment in polymer matrices, 129
Reduction of radicals
Investigating the reduction characteristics of transient free radicals by laser-pulse electron photo-injection—mechanism diagnostic criteria and determination of reactivity parameters from time-resolved experiments, 157
Ruthenium electrodes
Impedance of ruthenium electrodes in sulphuric acid solution, 29

Simulation
Kinetics of sulfide ion adsorption at copper amalgam electrode, 200
Sodium montmorillonite
Electrocatalytic reduction of molecular oxygen on a sodium montmorillonite-methyl viologen carbon paste chemically modified electrode, 253
Spectroelectrochemistry
Electrochemical study of methylalkylviologens using an electrochemical quartz crystal microbalance, 224
Square wave voltammetry
Enhanced electron transfer for hemoglobin in poly (ester sulfonic acid) films on pyrolytic graphite electrodes, 53
Substitute
Characterization of a new spinel Li–Cr–Mn–O for secondary lithium batteries, 24
Sulfate ion
Adsorption of sulfate ions on monocrystalline copper electrodes: the structural effects, 1
Sulfide
Kinetics of sulfide ion adsorption at copper amalgam electrode, 200
Synchrotron source
'In-situ' observation of halide ion adsorption on a gold electrode using synchrotron far infrared spectroscopy, 258

Tetrathiafulvalene
Hydrogen bond complexation of dimethyl-[1-butyl-2,4-dioxo-(1H,3H)pyrimido]tetrathiafulvalene with aminopyridine derivatives probed by cyclic voltammetry, 212
Thermodynamics
Thermodynamics for the situation where there is a discontinuous change of the electrode condition with potential due to the formation of a two dimensional condensed phase—diffuse layer effects, 9
Two-compartment cell
Construction of a new dehydrogenation system using a two-compartment cell separated by a palladized Pd sheet electrode, 116
Tyrosine
In-situ FTIR studies on the electrochemical oxidation of histidine and tyrosine, 218

UV-visible reflectance spectroscopy
Potential modulated reflectance spectroscopy of Pt(111) in acidic and alkaline media: cyanide adsorption, 109

Voltammetric response
Hydrogen bond complexation of dimethyl-[1-butyl-2,4-dioxo(1H,3H)pyrimido]tetrathiafulvalene with aminopyridine derivatives probed by cyclic voltammetry, 212
Voltammetry
Use of a zeolite-modified electrode for the study of the methylviologen–sodium ion-exchange in zeolite Y, 100

Zeolites
Use of a zeolite-modified electrode for the study of the methylviologen–sodium ion-exchange in zeolite Y, 100
